**RE: FUNDING MARIANNRIDGE SECONDARY SCHOOL MATHS PROGRAMME 2023**

The Maths tutoring programme 2023 urgently requires funds. The project has been in operation since its inception since 2019. It is a project with long term goals and our vision is for the continuation Beyond 2025. It is necessary to empower our learners by addressing the gaps and challenges posed to the existing education system by covid, lack of infrastructure and a shortage of qualified maths teachers.

The tutoring programme has transformed the school by improving the performance of learner's marks. The pass rate has improved considerably. This has also contributed to increased participation and interest in academic programmes.

The university student tutors are qualified to tutor the learners. They demonstrate the necessary skills and have the necessary knowledge to empower our learners. They always display a positive attitude, are punctual, attend to tutorial sessions regularly and research the tutorial material thoroughly in order to empower the learners.

The community supports this endeavour since learners spend more time on tuition, research and practising new techniques and methods that they have been exposed to during the sessions. Learners have greater opportunities since their improved results have enabled many to gain acceptance at university. This improves their future and is proving valuable in affording learners in the society a better chance at future employment and to become globally competent and skilled citizens.

More young people are presently being trained and mentored by the programme organisers. They have the necessary experience, qualifications and dedication to continue tutoring in the future. Marianridge Secondary maths programme will identify and train the future tutors require for this programme. However, the necessary funding is required from your organisation, to continue affording our learners this opportunity to improve their future prospects and to change the socio- economic conditions in this community affected by unemployment, drugs and crime.

Your assistance in this regard is highly appreciated.

Yours in Education,

**Mr NL Mtungwa**  
Principal
